

Energy Voice 2025

Energy Voice is a UK-focused, digital-first news platform for the Oil & Gas, Renewables and wider Energy Transition sectors. The platform has a rich global scope and is read in more than 200 countries.

We report breaking news from across the energy industry's key hubs, providing a diverse mix of columnists, in-depth market research, insightful analysis, exclusive video content, reports and up-to-the-minute industry coverage – all in one place. We're known for hard-hitting exclusives with the biggest players in the energy sector, including CEOs from TotalEnergies, BP, Shell, Equinor and Xlinks.

The UK's best-selling regional daily paper, The Press and Journal (P&J), has been delivering news since 1747. For more than 20 years, the Energy Voice monthly print supplement has been circulated along with the P&J.

JANUARY 2025

OFFSHORE WIND

Scottish Renewables Conference – 22-23 January

Kicking off the new year, Energy Voice will take a look at the UK's offshore wind sector. Grid connections, supply chain and sustainability are all on the agenda as we assess progress and ongoing challenges.

FEBRUARY 2025

SUBSEA

Subsea Exhibition & Conference - 18-20 February

Subsea Expo will return to Aberdeen in February and, as per usual, Energy Voice will be there in full force. What's going on beneath the UK's waters? Moorings, cables, ROVs and much more will be the focus of the month.

MARCH 2025

HSE & LICENCE TO OPERATE

Making sure workers are safe and well looked after should always be at the forefront of the energy sector and, in March, we plan to highlight this. Is mental health getting enough attention offshore? What concerns are being raised by unions and trade bodies? We'll do the digging.

APRIL 2025

FINANCE AND M&A

Spring budget/start of new financial year

It's the start of the financial year and enough time has passed to assess the impact of Labour's first budget as we look ahead to the Spring statement. From mergers and acquisitions to tax gripes, the Energy Voice team look to keep their finger on the industry's financial pulse.

MAY 2025

'CLEAN ENERGY MISSION' HEALTH CHECK

All-Energy – 14-15 May

Looking to Glasgow, All-Energy is set to return to the west coast in May. This month will be the best time to check in on how the UK's renewable energy ambitions are progressing.

**JUNE
2025**

UK AND GLOBAL ENERGY

EIC's Energy Exports Conference - 3-4 June

The UK represents just 2% of the global energy market, EIC chief executive Stuart Broadley said last year. What's the opportunity for UK firms overseas? We'll find out ahead of the Energy Exports Conference.

**JULY
2025**

EMISSIONS & CCS

The Finch case made waves last year as operators started keeping an eye on downstream emissions. In addition to this, CCS will need to forge ahead if the UK wants to slash CO2 levels. Over the summer, emissions and carbon capture and storage will be the focus.

**AUGUST
2025**

DEI

Prelude to W.I.N.E.

'No 'manels' by September 2025' was the message from last year's Women In New Energy event, but how is that progressing? Ahead of this year's W.I.N.E. event, Energy Voice will investigate if industry is moving the dial on DE&I.

**SEPTEMBER
2025**

OFFSHORE EUROPE

Aberdeen's premier energy conference is back, but what is the plan? Get the lowdown on all things Offshore Europe in September's edition of Energy Voice.

**OCTOBER
2025**

FLOATING WIND

FLOW conference

The Floating Offshore Wind Conference returns to Aberdeen in October, but is the sector facing the same challenges as last year? The UK will have to keep moving if it wants to maintain its world-leading status in this space.

ENERGY VOICE 2025

NOVEMBER 2025

DECOMMISSIONING

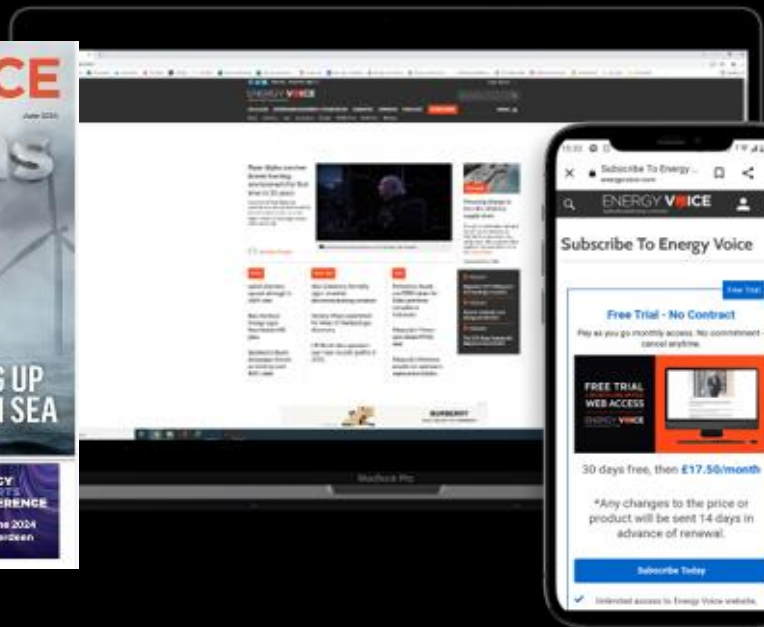

OEUK Decom conference – 24-26 November

The UK often champions its world-class supply chain, and this can be demonstrated by the country's work in decommissioning. What infrastructure needs to go and where is it going? Find out in October's Energy Voice.

DECEMBER 2025

YEAR IN REVIEW

Is it that time of year already? In December, we'll take a look back on 2025, identify the key trends and see what 2026 has in store for the sector.
